ITEM NO. 9

The Shareholders of the Company are informed that the Company had approached Corporate Debt Restructuring Cell (CDR Cell) set up by Reserve Bank of India for the restructuring of the debts of the Company under the CDR mechanism. The

CDR Cell had been kind enough to approve the restructuring proposal of the Company.

In pursuance to the said approval various concessions/facilities have been sanctioned to the Company including sanction of additional facilities, waiver of penal interest/compound interest/liquidated damages, sanction of additional loans, waiver of 50% of the differential interest on account of reduction of interest rate on term loans.

The approval also stipulates conversion of 50% of the differential interest on account of reduction of interest rate on term loans into 10% Cumulative Redeemable Non-Convertible Preference Shares which aggregates to Rs. 208.50 lacs.

Accordingly, subsequent to the approval of Shareholders of the Company in the Annual General Meeting held on 29th September, 2003, 208500, 10% Cumulative Redeemable Non-Convertible Preference Shares on private placement basis were issued to the banks/institution(s) as per details given in the Resolution.

The Company is planning to exit the CDR mechanism, therefore the lenders may insist on early redemption. Also the post tax yield of 10% is expensive as compared to other funds.

In the financial year ended March 31, 2008, the Company has posted profit before tax Rs. 14.74 Crores and the profit earning trend is expected to continue in the coming years. Therefore, the Company visualizes making early redemptions of the aforesaid Preference Shares.

The Board of Directors in its meeting held on May 28, 2008 have approved the proposal of making early redemption of the aforesaid Preference Shares.

The Board of Directors recommend the Shareholders to approve the proposal of early redemption of the Preference Shares and pass the Special Resolution as set out in Item No. 9 of the Notice.

NATURE OF INTEREST IN THE RESOLUTION

MANAGEMENT DISCUSSION AND ANALYSIS

BGL continues to be the leader in India for manufacture and supply of Gear Components for the Heavy/Medium Commercial

Vehicles, Utility Vehicles and for the Agricultural Tractors. In addition to Domestic OEM segment, exports of automotive gears is an important thrust area for the Company.

(a) Industry Structure & Development in the Industry:

The Indian automotive industry comprises of the following product segments-

- Passenger vehicles (UV & MPV)
- Commercial vehicles (HCV, MCV and LCV)
- Cars
- Two wheelers and Three wheelers
- Tractors
- Off-highway vehicles and other mobile construction equipment.

During the year under review all segments of the industry, except two wheeler have maintained growth. The Automobile Sector in India continues to be a leading contributor to National Economic Growth.

Tractor Industry:

Indian tractor industry has recorded a modest growth this year as compared to previous year.

However, our Company has maintained its share at 45% of the industry sale in the year.

Demand from the tractor industry is encouraging; the export market for our customers is also expanding rapidly this will add additional volume to our turnover.

Commercial Vehicle Industry:

As reported in the Indian Automobile Manufacturers Report for the year, the domestic industry recorded a growth of about 6% during the period and exports grew by about 19%.

LCV's recorded a growth of 13%, while the production of Medium and Heavy Commercial Goods Vehicles was lower by 4%.

The Commercial Vehicle Sector has recorded capacity increase by all manufacturers.

Our Company continues to be important supplier to this sector.

Passenger Vehicles:

As reported in the Indian Automobile Manufacturers Report for the year Utility Vehicle (UV) sales grew by about 11% over that of the previous year, and the growth is expected at about 20% in the current year. All players have introduced new models and have plans to widen their product range in the financial year 2009.

Other vehicles in this category have posted growth of about 20%.

Your Company is active supplier of Gear components to the manufactures of vehicles in this sector.

(b) Opportunities and Threats:

In line with WTO agreement, import duties were further lowered for automotive components. Norms for foreign direct investment

have also been liberalized. Thus foreign OEM as well as component manufacturers have entered the auto component industry in India, both for captive consumption and Global sourcing.

Power shortages continue to be a major cause of concern.

The alloy steel prices have continued to move up and are putting pressures on margins; the availability is also a cause of concern.

Further, the increase in cost of fuel is also equally a matter of concern.

Your Company continues its efforts to review and refine the production processes, affect economies where ever possible, maximize utilization of its resources in Men and Materials to bring about economical production and maintain its competitiveness.

Considering that the GDP growth rate may be about 8% in 2009, and as monsoon is expected to be normal, thus the Industry should maintain a reasonable growth.

(c) Outlook:

BGL has achieved 17% growth over the previous year. It is expected that notwithstanding inflationary pressure, it will maintain its tempo of growth both in Domestic and Export markets.

On the Export front, the Company caters to OEM orders from Europe, China and USA and are also active in the Middle East aftermarket. As stated earlier the opportunities in India are attracting major international OEMs. They have started sourcing components from Indian manufacturers. Further, existing OEMs have stepped up operations to cater to domestic and export requirements. However, despite competition, the outlook is positive and we are gearing ourselves to meet the competition.

Outlook on furnace business continues to be good. New Investment by the existing Automobile manufacturers and by New Entrants in the Automobile sectors will add to our order book.

(d) Risk & Concerns:

The Company is exposed to the following risks however the Company has braced itself to take adequate precautions to mitigate these risks on continuous basis

- a) Foreign Currency risks
- b) Raw Material prices
- c) Availability and cost of Capital for capital expenditure
- d) Other cost increases due to high rate of Inflation.

(e) Internal Control Systems and their adequacy:

The Company maintains adequate internal control systems, which ensures proper recording of all transactions of its operations.

An independent firm of Chartered Accountants carries out internal audit of the Company. Internal audit is carried out at periodic intervals to ensure that the Company's internal control systems are adequate and complied with.

Both plants of the Company are certified under ISO/TS16949.

Faridabad plant is also certified under ISO14001.

(f) Discussion on Financial Performance with respect to operational performance:

Demand for your Company's products continued to be buoyant. Turnover increased by 17% over that of the previous year. However, EBIDTA was lower at 12% vis - a - vis 13.5 % for the previous year. This was mainly on account of higher input costs of steel & petroleum products. These increases are sought to be mitigated by improvement in operational efficiencies & optimizing product mix. Profit before tax was higher at Rs. 14.74 crores as against Rs. 11.72 crores in the previous year. After provision for tax (net of MAT credit of Rs. 0.53 crores) Rs. 1.77 crores & deferred tax of Rs. 2.58 crores, Net profit after tax was at Rs. 10.08 crores as against Rs. 8.79 crores for the previous year.

(g) Developments in human resources and industrial relations:

Industrial relations at both plants continued to be satisfactory.

Under the Voluntary Retirement Scheme, 35 employees left the Company at cost of Rs. 1.25 crores.

Employees' headcount at the end of the year was 1329.

A Statement required under Section 217(2A) of the Companies Act, 1956 is annexed.

FIXED DEPOSITS

During the year under review the Company did not accept any fixed deposits. In terms of Section 205C of the Companies Act 1956, the deposit and interest thereon which remains unclaimed for a period of seven years from the date when it became due is required to be deposited with the Investor Education and Protection Fund established under the Companies Act, 1956. Accordingly, a sum of Rs. 6,125 towards unclaimed interest on fixed deposits in respect of on matured deposits was deposited with the said fund during the year.

Report on Conservation of Energy, Technology Absorption, Foreign Exchange Earnings and Outgo and forming part of Directors' Report for the year ended March 31, 2008

A. Conservation of energy

a) Energy conservation measures taken:

At Mumbra Plant, the program of replacing the North lights roofing with transparent material is almost completed, thereby improving the natural lighting in the shop and reducing lighting requirement. Further wind driven turbo ventilators are being installed on the roof of the shop in a phased manner. Free wind drives the turbine and as the turbine rotates the centripetal forces associated with the rotation fling air outwards from the tips of the vanes. Replacement air is automatically drawn into the throat of the ventilator from the shop causing continuous ventilation thereby reducing humidity, promoting health, reducing maintenance of machinery and increasing productivity.

b) Additional investments and proposals, if any, being implemented for reduction of consumption of energy:

We have installed a new diesel generator at Mumbra plant. This will reduce production interruptions due to power failures as well as reduce tool breakage and shop rejections due to sudden failure of power.

c) Impact of the measures (a) to (b) above for reduction of energy consumption and consequent impact on the cost of the production of goods;

To encourage electrical consumers to maintain Unity Power Factor, MSEB the power utility Company for Mumbra plant gives an incentive of 7% of the energy charge. We are continuing to avail of this discount over last twelve months.

- d) Total energy consumption and energy consumption per unit of production as per Form A of the Annexure in respect of industries in the Schedule thereto:

v) Foreign Currency Transactions:

Foreign currency transactions during the year are recorded at the rate of exchange prevailing at the date of transaction. All foreign currency monetary items outstanding at the year end are translated at year end exchange rates. All foreign exchange gains or losses are accounted for in the profit and loss account. In case of forward exchange contracts premium or discounts are amortised as expense or income over the life of the contract. Profit or loss arising on cancellation or renewal of such forward exchange contracts are recognised as income or expenses for the year.

vi) Revenue recognition:

Sales/ Processing charges are accounted on the basis of actual dispatches to the customers. Sales are net of sales tax / value added tax and trade discounts.

Revenue from contracts for construction of furnaces is recognised on the percentage of completion method based on the stage of completion determined with reference to the contract costs incurred up to the year end and the estimated total costs of the contracts.

Net income, if any, from development of tools is recognised as income as and when the tools are sold in terms of respective contracts/ supply under the contract is completed/ on the expiry of commercially useful life of tools/ on expiry of five years from completion of development, whichever is earliest.

Deferred tax assets are recognised on unabsorbed depreciation and carry forward of losses only to the extent that there are timing differences, the reversal of which will result in sufficient income or there is virtual certainty that sufficient taxable income will be available against which such deferred tax assets can be realised. The carrying amount of deferred tax assets is reviewed at each Balance Sheet date.
